AND SEE FOR YOURSELF WHAT WE HAVE TO OFFER

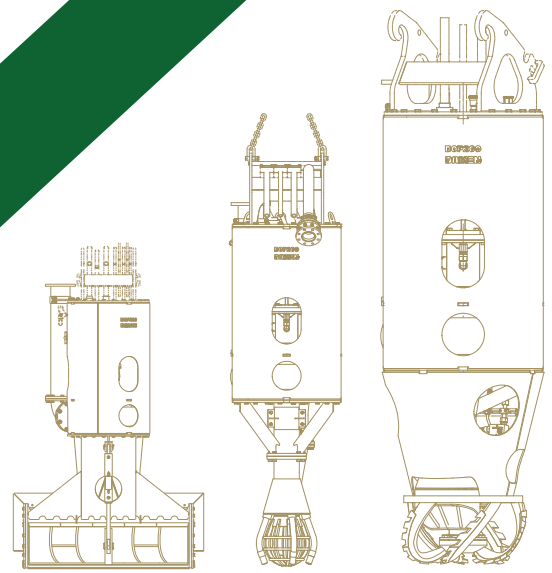

INNOVATION DRIVEN BY PASSION AND KNOWLEDGE ABOUT DREDGING

Waterking BV delivers complete new multi-purpose machines with a dredging pump! The Waterking Multi Dredgers have a 360° operating radius and can have a working range of 13 to 15 meters. The machines are designed to operate on land as well as in water, which makes it highly efficient. It is impossible for the machines to sink and it works under all kind of circumstances.

The special dredge pumps of Damen are wear resistant. The mounted pump is directly driven by a powerpack. This makes it unique. You can control the powerpack and the dredging pump from the cabin. The pump is only driven by the powerpack.

The dredging pump and powerpack are removable. When dredging takes place in vegetated swamp areas you can easily remove the debris with the Waterking Multi Dredger by using the bucket. The machine is multifunctional, you can dig and dredge without using another machine.

DISCOVER THE ADVANTAGES AMPHIBIOUS EXCAVATOR WITH DOP PUMP

The machines are delivered all over the world. The equipment is made of high quality as a result that excavators are safe, durable and highly reliable. The WK 220, 250 and 300 NG-5 excavators can be combined with the right DOP pump.

	WK 220 NG-5	WK 250 NG-5	WK 300 NG-5
